This is undeniable.....

## Section 1: The Luminaries - A Summary

This section will be used to introduce you to the Zodiac and the Luminaries that play a special part of your journey.

You will, in time, get to know each and every one of them. Take your time. Be aware of how these are part of your birth chart as well as your transits amongst your birth chart.

What you will be reading in the next couple of pages are experiences from learning from others, research, and most importantly, how they have been communicating through epiphanies, apparitions, numerology, and being awakened up during sleep.

Everyone will have slightly different experiences. You have your own "DNA" or chart that you MUST become familiar with. The more you vibe with the luminaries, the more they will interact with you. This is the Collective Consciousness. The One Love. The Absolute.

## Vibrations of the Visible Luminaries - Glandular - Physical - Body

	The Moon represents phases / amplification of energy which is a pure female aspect of the aether.... The Moon is the fastest luminary that transits all other luminaries. The most communicative of all. The motherly watchful eye. Mama moon plays the organs....
	Mercury is the holder of the akashic records. All lives, past, present and future. Plant seeds/ manifestations/communications/navigation. When you see Mercury in a sign it's where your seeds need attention. You can think of Mercury as the one who decides if you skip a grade, go back or stay on your path.
	Venus provides abundance of Love and nurturing for seeds/manifestations ... She is also the Egyptian glyph of the Ankh. Representing the "self" love between the physical you and the Metaphysical Collective Consciousness / One Love / Arahant.
	The Sun Represents the "Son" of the "Mother" and is your Guide on all things Material... Keep your images positive as all images you allow in become real. Manifest daily with positive images!!! Know that Juno Represents the Earthen Mother and Eris Represents the Spirit Mother of all Mothers.
	Mars is the Shape of Seeds, Shape of Manifestations, how your manifestations shape up. Mars will light up your chart and that organ/vibration/chakra. Keep them clean or Mars will do it for you. Keep an eye on Hygeia during Mars Transits. These are cleanses of not good vibrations you've allowed into your being.
	Jupiter represents abundance of lessons of Astrologos/Astrology.... The Principle of Expansion and revelation.
	Saturn represents father time, when time seems to be standing still, or going too fast, its a message to you that you are being communicated to. Pay attention to the stars/luminaries and the guidance you are being given.... 30 Year Life Lessons... Your first Solar return @~30 years and second at ~60 years. Look ahead and see what is in your future.

## Vibrations of the Non-Visible Luminaries - MetaPhysical - Mind

	Uranus is the Windmill of life and brings in the good and keeps things moving... Think "Winds of Change". The Conscious mind. Represents the Heavens/Dome/Firmament
	Neptune provides great energies/weather internal and external. Learn how to use it... Imagination. Represents the Crystalline Sea.
	Pluto represents the deeper side of regeneration to spiritual, watching over how you create your manifestations/wants...Subconscious Mind.

**IMPORTANT:** Retrograde in a chart will be represented by a Luminary with a Black Line beside it.

Like this...

This physically means the luminary is going through a small epi-cycle or reversing direction in the sky. Metaphysically this means you are to go inward or will feel inward to work on what that Luminary wants you to work on.

## Vibrations of the Non-Visible Luminaries (Cont'd)

	<p>Eris, the Mother of All Mothers, represented in all cultures as Madonna, Isis, Mictecacihuatl, Ma'at, Freja, Ereshkigal, Persephone, Santa Claus-trum, La Befana, White Buffalo Calf Woman, Queen of the Underworld. She is coming round the mountain riding six white horses. She returns every approx. 500 years to check to see who has been good or not good. She will make things right, with karma and natural order...</p> <p><b>IMPORTANT:</b> Easter 2022, She Rises with the Sun (Son) at "0" point Aries (Head). She has been transiting in and out of Pisces (Feet/red shift Materialism) into Aries (Head/Blue Shift/ Materialism). Pay attention to all luminaries as they will be meeting with her as she comes into Aries to stay for the first time in 559 years. She is check your 3rd eye to grade you on its vibration / color. This is the Corona Cleanse that the whole world is upon. The story of Santa Claus-trum.</p> <p>Be Good, there is still time to change the road you are on. Venus is the Mini-me of Eris.</p>
	<p>Juno is the Earthen Mother. Queen of the Heavens. Represents motherly partnerships from without and from within. "Without" = partnerships with people, animals, insects, etc. "Within" = partnerships with the true self/luminaries/angels/spirits/the absolute/god whatever you want to call it.</p> <p>Jupiter is the Mini-me of Juno.</p>
	<p>Ceres represents the goddess of harvesting souls. She works with you to ensure that you are maturing the right way for your spiritual journey. This is an inherent quality for you to ensure you stay on the right path. Plays a role in the labyrinths of lives, analogously to the snakes and ladders game.</p>
	<p>Vesta represents the sacred fire, the hearth, the celibacy of the Universe. "The Vestal Virgins". She wants to know that you understand the Path back to Eden. The path back to the Absolute. Learning how and when to procreate and when not to.</p>
	<p>Pallas represents the "Goddess of Wisdom, Creative Intelligence", the "Feminine Powers of Nature". She stands by heroes. The part of you that wants to Channel your Creative Energy... Cities are her domain. She plays a part with changing locations.</p>
	<p>Lilith represents the human potential, especially in the female nativity. Lilith is a balance between one being gifted and the incarnation of that gift. She represents the "temptress". Lilith is strong willed especially in the occult and unconscious... In other words expect the female yin in you, the female energies in all of us to grow. Gives capacity to constructively and lovingly resolve matters.</p>
	<p>Icarus leads you on how to ride on the edge only if you use it wisely. If you are not in tune with the luminaries then "boy wonder" can really make you spin in physical and spiritual circles.... The Story of the Boy who burned his wings flying too close to the Materialistic Sun.</p>
	<p>Hygiea represents cleansing energies in cleaning the mind, body and spirit. NOTE: glyph of Medicinal Caduceus. Neptune and Hygeia are the energies that change the W-eather... Mars/ Moon/Sun/Nodes lights these up! If you know that you have a cleanse coming in your chart (i.e. not feeling good) you need to look at which Plan(E)t is causing/asking for the cleanse and look to the Plant kingdom for help. This is where vibrations of plants, colors, etc come in for healing. You know, the stomach is the yellow chakra and the camomile flower is yellow.</p>
	<p>Chiron signifies a key to the universe, aether, god... Chiron represents all the classic visible luminaries and the link to the not visible by the human eye, i.e. Uranus, Neptune and Pluto, Eris, Juno, etc. Chiron is a bridge between the planets and is related to the parts of your body that needs healing. Chiron is known as the Wounded Healer.</p>

<b>Vibrations of the Gates / Cardinal Points</b>	
<b>A<sup>sc</sup></b>	Asc represents Ascendant which is beginnings of ones life, a cycle, a seed, etc. Look for who rises before the Sun, i.e. before the Sun passes the Asc Line on the Cross. Whomever crosses before the Sun, rules the Chart for the Day.
<b>D<sup>sc</sup></b>	Dsc represents the Descendant, is the opposite of the Asc, meaning your night/spiritual realm/underworld. Look for who is the first to cross the Dsc after the Sun Sets. Whomever crosses after the Sun, rules the Chart for the Night? Needs to be checked. No experience.
<b>M<sup>c</sup></b>	Mc represents the middle of the sky, so that you may align yourself, your chart. Helps you know who you are and your life purpose. Needs to be checked. No experience.
<b>I<sup>c</sup></b>	Ic represents the inner (midnight) qualities. This is the bottom of the sky or underworld. This is also Metaphysically your start of your Judgement Day / Pergatory / Sleep before you rise again on the Asc.. This you need to know and understand as this gets into the Metaphysics of Infinite Rebirths vs Ascending to the next part of your spiritual journey.
	Black Moon, Eris' Node, represents the "spiritual you" that teaches you when to say no to materialistic wants. She strives for the Absolute and will help you get there knowingly or unknowingly.
	Lot of Fortune or Part of Fortune represents being noble, wisdom of reason/destiny. Things are not by chance. It is a calculated point by adding the angle between Sun and Moon to the Ascendant. Needs to be checked. No experience.
	The Moon's South Node represents the karmic knowledge of the head eating the tail. If you are materialistic then know that there will be rebirths, resets, from lack of wisdom and knowledge on the path to the aether/heaven/absolute. It's been called the "ray of light". In Metaphysics this represent the collective consciousness, the first "1" in of the trinity 0,1,1 This is really quite simple. Ketu is the Yin/atman/metaphysical you. So don't be materialistic and keep chasing/eating your tail. Learn this wisdom/knowledge and use the luminaries as your guides.
	<p>Moon's North Node or Head of the Dragon/Snake represents future and destiny. Also known as Rahu. This represents how one handles materialism and the knowing that the true abundance that will always be yours is from the Tree of Knowledge.</p> <p>A quote from Ken Wheelers Book  <b>Monistic Metaphysics of the Sakya Disciples - The Tathagata</b>          "Such that forms, feelings, perceptions, impulses, and mental machinations of the mind are temporal, unreal, arise and pass, and are of the realm of phenomena and cannot be construed as what is everlasting, best, real, and most dear of the True Self and therefore must not be identified with the Attan as such."</p> <p>This is why Rahu is known to be the luminary that eclipses/eats the material sun. To remind us that we are living as spirits in a material world. The Moons North Node / Rahu is the Yang, anatman (not the True Self), the psychophysical you.</p>
<b>V<sub>x</sub></b>	Vertex is another gate/transcendent opening. Also Called Destiny's Gate. It represents a turning point in your journey. Think of it as graduating out of a particular study.

These Luminaries are guides that help you with graduating. Tune into them, that's what they are here for. All the situations you have, people you meet, spiritual/animal encounters, etc are your guides.

## Section 2: A Guide to Universal Key's Numerology & Vibrations

Universal Key, Numerology, Vibrations	
<b>1</b>	Manifestation, beginnings, wants or cycle starts. This is achieved through using your images and a peaceful nature. Careful what you ask for. When you see 1's just think that the universe just took a snapshot of your mind. See 1011 on the Universal Key.
<b>2</b>	Planting of seeds. Nurturing a Manifestation. Plant a seed, but make sure that it grows. For example, to get abundance, you must first plant a seed of giving food, clothing, love to people you don't know. You must be the role model for your manifestations to grow.
<b>3</b>	Higher spirits are around you. Ask for spiritual guidance. 3's are magical as they are the Golden Ratio numbers. Just think of 0-1-1. 0 representing the absolute or god head. 1-1 represents yin/yang. The first one is in an image of the absolute and the second 1 is your choices / manifestations / consciousness. This is what is meant by "Trinity". 3 golden triangles make a star. You are a Young-star / Young-ster. See 3033 on the Universal Key.
<b>4</b>	Angels/Archangels are around you. Ask for guidance with day to day items. 4's imply essential material items, water, food, clothing, shelter, the basic necessities.
<b>5</b>	You are on the right path. 3 golden triangles make a star or pentagram which is the 5 pointed star. At that moment you are aligning with the universe. In tune!...
<b>6</b>	The Yang side of the trinity is materialistic. Note the "g" in Yan"g" represents the number 7. It is the seventh letter of the alpha-beta. 7 colors of the rainbow, it sits on the As above on the Universal Key (see 7 below). When you see 6's, check to see if your material wants are in tune with the universe and you are sharing.
<b>7</b>	You are really good at manifesting. Your manifestations in the material and spiritual realm are in line with your journey. Note that every number can be divided into 360 except for 7. 7 is a true testament of your connection. See 7077 on the Universal Key.
<b>8</b>	8's are very interesting. They mean abundance, i.e. infinity, but also means the "in" and "out" of this material realm. "h" is the 8th letter representing the throne in which the Woman sits to bring you into this world, repeatedly until you get it right. i.e. infinite rebirths with karmic attachments good and not good.
<b>9</b>	9's are end of cycles. Get ready for new beginnings. There are many cycles. Just like a clock has 60 secs, 60 min, 24 hour cycles, luminaries having cycles, including the zodiac cycle $72 \times 360 = 25920$ years. See 9099 on the Universal Key. Cycles are from the micro to the macro. This is called incommensurability. As the mountains are the trees so too are they a cycle that we've forgotten about.
<b>0</b>	Combined with other numbers this is an amplification. This means No-thing i.e. no material, the absolute, god-head, stillness, balance. No beginning. No end. This is the meaning of after life and no more infinite rebirths. This is where wisdom comes in and knowing that self is not what self is. This represents the point in the middle where there is no-thing material.

## Section 1b: About the Stars

Anne Wright 2008

<https://www.constellationsofwords.com>

The Four key stars in the heavens, also called archangel stars.

Michael ([Aldebaran](#)) watcher of the East.

Gabriel ([Fomalhaut](#)) watcher of the South.

Oriel ([Antares](#)) watcher of the West.

Raphael ([Regulus](#)) watcher of the North.

At one time they marked the two Equinoxes and two Solstices.

[Aldebaran](#) marked the zero Aries point in 3044 BC,

[Fomalhaut](#) marked zero Capricorn, 2582 BC,

[Antares](#) marked zero Libra 3052 BC,

[Regulus](#) marked zero Cancer 2345 BC.

## Section 2: METAPHYSICS = PHYSICS

### 0-1-1

There is so much in the “Universal Key” or what may be referred to as the DaVinci Code. This is a clock from micro to macro. Most important is the Re-Start of a cycle being 0-1-1 as explained in the numerology section. For convenience sakes I will re-explain it here. 0-1-1. 0 representing the absolute or god head. 1-1 represents yin/yang. The first “1” is an image of the absolute which is bound to the second “1”. The second “1” is your conscious which can make choices / manifestations. You are always connected to the “yin” and ultimately to the “absolute”.

IMPORTANT....The diagram to the right comes from the golden ratio series that you can teach to a child. If you have not done this you need to. All children will be taught this in school so you should learn to count how the heavens count.

Starting with 0, add 1, now always take the last two numbers and add them. Keep going only keeping the first digit.

$$\begin{array}{c}
 1+1= \\
 \underbrace{\quad} \quad \underbrace{\quad} \quad \underbrace{\quad} \quad \underbrace{\quad} \\
 0, 1, 1, 2, 3, 5, 8, 13, 21, \dots \\
 \underbrace{0+1=} \quad \underbrace{1+2=}
 \end{array}$$

Do this and you will see that they repeat every 60. Wrap them on a circle and you have the key to the universe and how everything physical and metaphysical works. Now we will show few of the things you will see as it would take a whole book.

### Swastika / Cross / Gates

- 1011 = a = alpha = aries, arise, Yang cycle, beginning of a cycle
- 9099 = o = omega = libra, set, Yin cycle, ending of a cycle
- 7077 = g = as above, light you can see, 7 colors of the rainbow, material gate
- 3033 = u = as below, light you cannot see, trinities, spiritual/star gate.

**0, absolute. 1-9, The only numbers. What about 10, 11 & 12?**

This one came while lying awake in the middle of the night. Note that the letters wrapped around are glyphs from the alpha-beta.

9 = i = rebirth end of cycle

10 = j = rebirth akashic records, purgatory cycle, day of reckoning, judgement cycle, whatever you want to call it.

11 = k = getting your yin yang

12 = l = becoming

Where does this information come from?

From the universal key.

Look at the numbers as we end a cycle.

From the Universal Key

9,1,0,1,1,2.

Do you see 9, 10, 11, 12?

There are only 9 numbers and the absolute.

The alpha-beta is another section.

Letters are words/glyphs. We are speaking words which are sentences.

The mysterious 13th letter is the MN in the middle. The MooNKey in the middle.

At this point, reference for further proof of the absolute and the connection of the 1,1. This is from the writings of Ken Wheeler. If you are interested you can follow this link...

Monistic METAPHYSICS Article I wrote for you

# The River of Heaven

You've Heard of the "Milky Way" Right? Where most of the stars stretch across the sky in a beautiful white band?

Well, this is also called the Galactic Center. But it is really the "River of Heaven". Where the Akashic Records of all live past, present and future are kept.

Look at the image/universal key. How can a circle wrapped with the golden ratio 60 repeating numbers show the "River of Heaven"? The Ancients knew it. They built the Great Pyramid of Gizza 3/60ths from True North i.e. 18 degrees.

~28° Sagittarius  
 River of Heaven  
 Milky Way  
 Galactic Center  
 Akashic Records

Every Addition is I and O = phi  
 I+O=0 = phi

Great Pyramid 3/60 from True North Points to 369 18 deg

# Music, Vibrations at every 5th.

This is where sound vibration, harmonics, music, organs, chakras, frequency presents itself to you. We won't spend much time on this topic, just know that it is there. We will just touch on Music. Everything in this visible universe has frequency/harmonics. This is incommensurate nature of the uni-verse.

Looking at the Universal Key we will show music fact, not theory.

Using an accordion, biased lol, caused I used to play it. The 120 Base buttons on the accordion are set up in chord progressions.

Note middle C has no Sharps # or Flats ♭

- B - 5 #'s
- E - 4 #'s
- A - 3 #'s
- D - 2 #'s
- G - 1 #
- C - No Sharps # or Flats ♭
- F - 1 ♭
- B♭ - 2 ♭'s
- E♭ - 3 ♭'s
- A♭ - 4 ♭'s
- D♭ - 5 ♭'s

Look at the Universal Key  
Wrapping 5 Octaves above and Below

- C at the 0
- G, D, A, E, B at Every 5th
- F, B♭, E♭, A♭, D♭ At Every 5th

Note D♭ = C♯

Note:  
5 black Keys  
7 White Keys  
12 Keys Total...

7-white keys  
5-black keys  
the number 12

There is so much more, like C,E,G being a Major Triad. Look at the C E G on every 3rd above... Can you see them?

## **See You Again Soon!**

This concludes this small excerpt from the book being assembled “Our Journey as Arahant”. Note that the Metaphysics=Physics is only a very small portion of what can be shown on the Universal Key. The Books listed from Ken Wheeler will help you tremendously for understanding what is written in here about Metaphysics. Ken Teaches the “premise” of understanding very well. Once you get this, you can tread through the waters with ease as you will be guided more than you know.

Thanks for reading.

Peace, Love and Cheers,

Claudio.....
